

Performance, Portfolio Breakdowns and Characteristics, and Net Assets as at 30-Nov-2023. All other data as at 14-Dec-2023.

IMPORTANT:

- The Fund's investments in equities could incur significant losses due to higher fluctuation of equity values. Use of environmental, social and governance ("ESG") criteria as the investing principles may impact the Fund's performance. Reliance on third party data may lead to incorrect evaluation of a security or issuer based on ESG criteria. There may also be a risk of incorrectly applying the relevant ESG criteria on the Fund. The evaluation methodology adopted by different investment managers may vary due to a lack of standardized taxonomy on circular economy concept. The Fund's investments are concentrated in companies that benefit from or contribute to the advancement of the circular economy concept. This may result in greater volatility than more broad-based investments.
- The Fund is subject to currency risks, emerging market risks, securities lending counterparty risks, smaller companies' volatility and liquidity risks, and currency conversion risk including Renminbi denominated Classes.
- **Class 5(G) Shares** pay dividends gross of expenses. **Class 10 Shares** pay dividends gross of expenses and/or from capital at the Directors' discretion. Paying dividends gross of expenses may result in more income being available for distribution; however these shares may effectively pay dividends from capital – may amount to a partial return or withdrawal of an investor's original investment or capital gains. All declared dividends result in an immediate reduction in the NAV price of the share class on the ex-dividend date.
- The Fund may use derivatives for hedging and for investment purposes. However, usage for investment purposes will not be extensive. The Fund may suffer losses from its derivatives usage.
- The value of the Fund can be volatile and can go down substantially within a short period of time. It is possible that a certain amount of your investment could be lost.
- Investors should not make investment decisions based on this document alone. Investors should refer to the Prospectus and Key Facts Statement for details including risk factors.

INVESTMENT OBJECTIVE

The Circular Economy Fund seeks to maximise total return. The Fund invests at least 80% of its total assets in the equity securities of companies globally that benefit from, or contribute to, the advancement of the "Circular Economy". The Circular Economy concept recognises the importance of a sustainable economic system and represents an alternative economic model to the default "make-use-throw away" approach of consumption, which is believed to be unsustainable given scarce resources and the rising cost of managing waste. The Circular Economy concept promotes the redesign of products and systems to minimise waste and to enable greater recycling and reuse of materials.

GROWTH OF 10,000 SINCE LAUNCH

Past performance is not a reliable indicator of current or future performance and should not be the sole factor of consideration when selecting a product or strategy. Investors may not get back the full amount invested. Performance is shown on a Net Asset Value (NAV) basis with gross income reinvested, net of fees. Performance is calculated in the relevant share class currency, including ongoing charges and taxes and excluding subscription and redemption fees, if applicable. Benchmark performance displayed in denominated currency and for comparative purpose only.

SECTOR BREAKDOWN (%)

Negative weightings may result from specific circumstances (including timing differences between trade and settlement dates of securities purchased by the funds) and/or the use of certain financial instruments, including derivatives, which may be used to gain or reduce market exposure and/or risk management. Allocations are subject to change. Due to rounding, the total may not be equal to 100 %.

GEOGRAPHIC BREAKDOWN (%)

Geographic exposure relates principally to the domicile of the issuers of the securities held in the product, added together and then expressed as a percentage of the product's total holdings. However, in some instances it can reflect the geography where the issuer of the securities carries out much of their business. "Others" excluded from the chart above.

SUSTAINABILITY CHARACTERISTICS

Sustainability Characteristics can help investors integrate non-financial, sustainability considerations into their investment process. These metrics enable investors to evaluate funds based on their environmental, social, and governance (ESG) risks and opportunities. This analysis can provide insight into the effective management and long-term financial prospects of a fund.

The metrics below have been provided for transparency and informational purposes only. The existence of an ESG rating is not indicative of how or whether ESG factors will be integrated into a fund. The metrics are based on MSCI ESG Fund Ratings and, unless otherwise stated in fund documentation and included within a fund's investment objective, do not change a fund's investment objective or constrain the fund's investable universe, and there is no indication that an ESG or Impact focused investment strategy or exclusionary screens will be adopted by a fund. For more information regarding a fund's investment strategy, please see the fund's prospectus.

MSCI ESG Fund Rating (AAA-CCC)	AA	MSCI ESG Quality Score (0-10)	7.90
MSCI ESG Quality Score - Peer Percentile	95.11%	MSCI ESG % Coverage	99.39%
Fund Lipper Global Classification	Equity Global	MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES)	213.22
Funds in Peer Group	5,399		

All data is from MSCI ESG Fund Ratings as of **25 Oct 2023**, based on holdings as of **30 Jun 2023**. As such, the fund's sustainable characteristics may differ from MSCI ESG Fund Ratings from time to time.

To be included in MSCI ESG Fund Ratings, 65% (or 50% for bond funds and money market funds) of the fund's gross weight must come from securities with ESG coverage by MSCI ESG Research (certain cash positions and other asset types deemed not relevant for ESG analysis by MSCI are removed prior to calculating a fund's gross weight; the absolute values of short positions are included but treated as uncovered), the fund's holdings date must be less than one year old, and the fund must have at least ten securities.

ESG GLOSSARY:

MSCI ESG Fund Rating (AAA-CCC): The MSCI ESG Rating is calculated as a direct mapping of ESG Quality Scores to letter rating categories (e.g. AAA = 8.6-10). The ESG Ratings range from leader (AAA, AA), average (A, BBB, BB) to laggard (B, CCC).

MSCI ESG Quality Score - Peer Percentile: The fund's ESG Percentile compared to its Lipper peer group.

Fund Lipper Global Classification: The fund peer group as defined by the Lipper Global Classification.

Funds in Peer Group: The number of funds from the relevant Lipper Global Classification peer group that are also in ESG coverage.

MSCI ESG Quality Score (0-10): The MSCI ESG Quality Score (0 - 10) for funds is calculated using the weighted average of the ESG scores of fund holdings. MSCI rates underlying holdings according to their exposure to industry specific ESG risks and their ability to manage those risks relative to peers.

MSCI ESG % Coverage: Percentage of the fund's holdings for which the MSCI ESG ratings data is available. The MSCI ESG Fund Rating, MSCI ESG Quality Score and MSCI ESG Quality Score – Peer Percentile metrics are displayed for funds with at least 65% coverage (or 50% for bond funds and money market funds).

MSCI Weighted Average Carbon Intensity (Tons CO2E/\$M SALES): Measures a fund's exposure to carbon intensive companies. This figure represents the estimated greenhouse gas emissions per \$1 million in sales across the fund's holdings. This allows for comparisons between funds of different sizes.

MSCI Weighted Average Carbon Intensity % Coverage: Percentage of the fund's holdings for which MSCI Carbon Intensity data is available. The MSCI Weighted Average Carbon Intensity metric is displayed for funds with any coverage. Funds with low coverage may not fully represent the fund's carbon characteristics given the lack of coverage.
